

Energy Policy

As an energy intense manufacturer of speciality building components, Catnic is fully committed to reducing its energy consumption and costs and promote the long-term environmental and economic sustainability of its operations. We believe in preserving natural resources, reducing atmospheric emissions and helping to mitigate the effects of climate change.

Catnic will deliver a healthier and more sustainable environment, as well as associated cost efficiencies, to the benefit of our people, customers and the communities in which we operate.

Management will champion, lead and promote energy efficiency programmes, ensuring that Catnic works in accordance with the principles defined in our ISO 50001 Energy management system.

Catnic will use this policy as a framework for setting and reviewing energy objectives and targets at relevant functions and levels in order to improve energy performance and reduce the relevant energy sources used. In order to achieve this, Management will ensure the availability of the necessary information and resources.

Catnic is committed to continual improvement in energy performance by improving the use of energy resources at its sites and offices during its activities, throughout their entire life cycle. We will go further and lead by example, spearhead new techniques and optimise existing technologies wherever possible.

Management will support the purchase of energy-efficient products and services, for energy performance improvement.

Catnic will ensure compliance with all applicable legal requirements which relate to energy aspects, and other requirements to which the organisation subscribes related to energy performance, including energy efficiency and the use and consumption of energy. The company will also encourage the adaption of its operations and facilities to ensure compliance with future legal changes, and will establish common standards for the management of energy efficiency in all areas of the business in which it operates.

In order to promote greater awareness among all of its stakeholders, Catnic will provide them with reliable and transparent information regarding its energy consumption, its corresponding greenhouse gas emissions and the improvement actions undertaken.

Catnic considers compliance with this policy is the responsibility of all individuals who take part in the company's operations and activities.

This policy shall be communicated to all our employees in order to keep the awareness and commitment at a high level. The management team will report on performance and review this Policy, Objectives & Targets on an annual basis.

- Reduce energy use per unit of production throughout our manufacturing operation
- Ensure continual improvement in our energy performance
- Deploy information and resources to achieve our objectives and targets
- Uphold legal and other requirements regarding energy
- Consider energy performance improvements in design and modification of our facilities, equipment, systems and processes
- Effectively procure and utilize energy-efficient products and services

David Hanson
Managing Director
